**MASON CASH**

**Cake Decorating Tools – Serrated and Tapered Cone Tool**

Used to indent or emboss into paste to create a cone shaped hollow, the Mason Cash serrated and tapered cone tool is ideal for modeling flowers and filling. The serrated cone end creates detailed throats when making flowers. Our modelling tools are ideal for use with a wide range of edible and non-edible materials including: sugar paste (rolled fondant), petal paste (gum paste), marzipan or craft clays.

**Note:**

Tools used with food products should be kept separate from those used with non-food materials e.g. craft clay. Wash before first use, rinse and dry thoroughly.
